

What makes us
Unique

Vacuum Suction

Our patented grip gives immediate and effective purchase against wet and greasy surfaces.

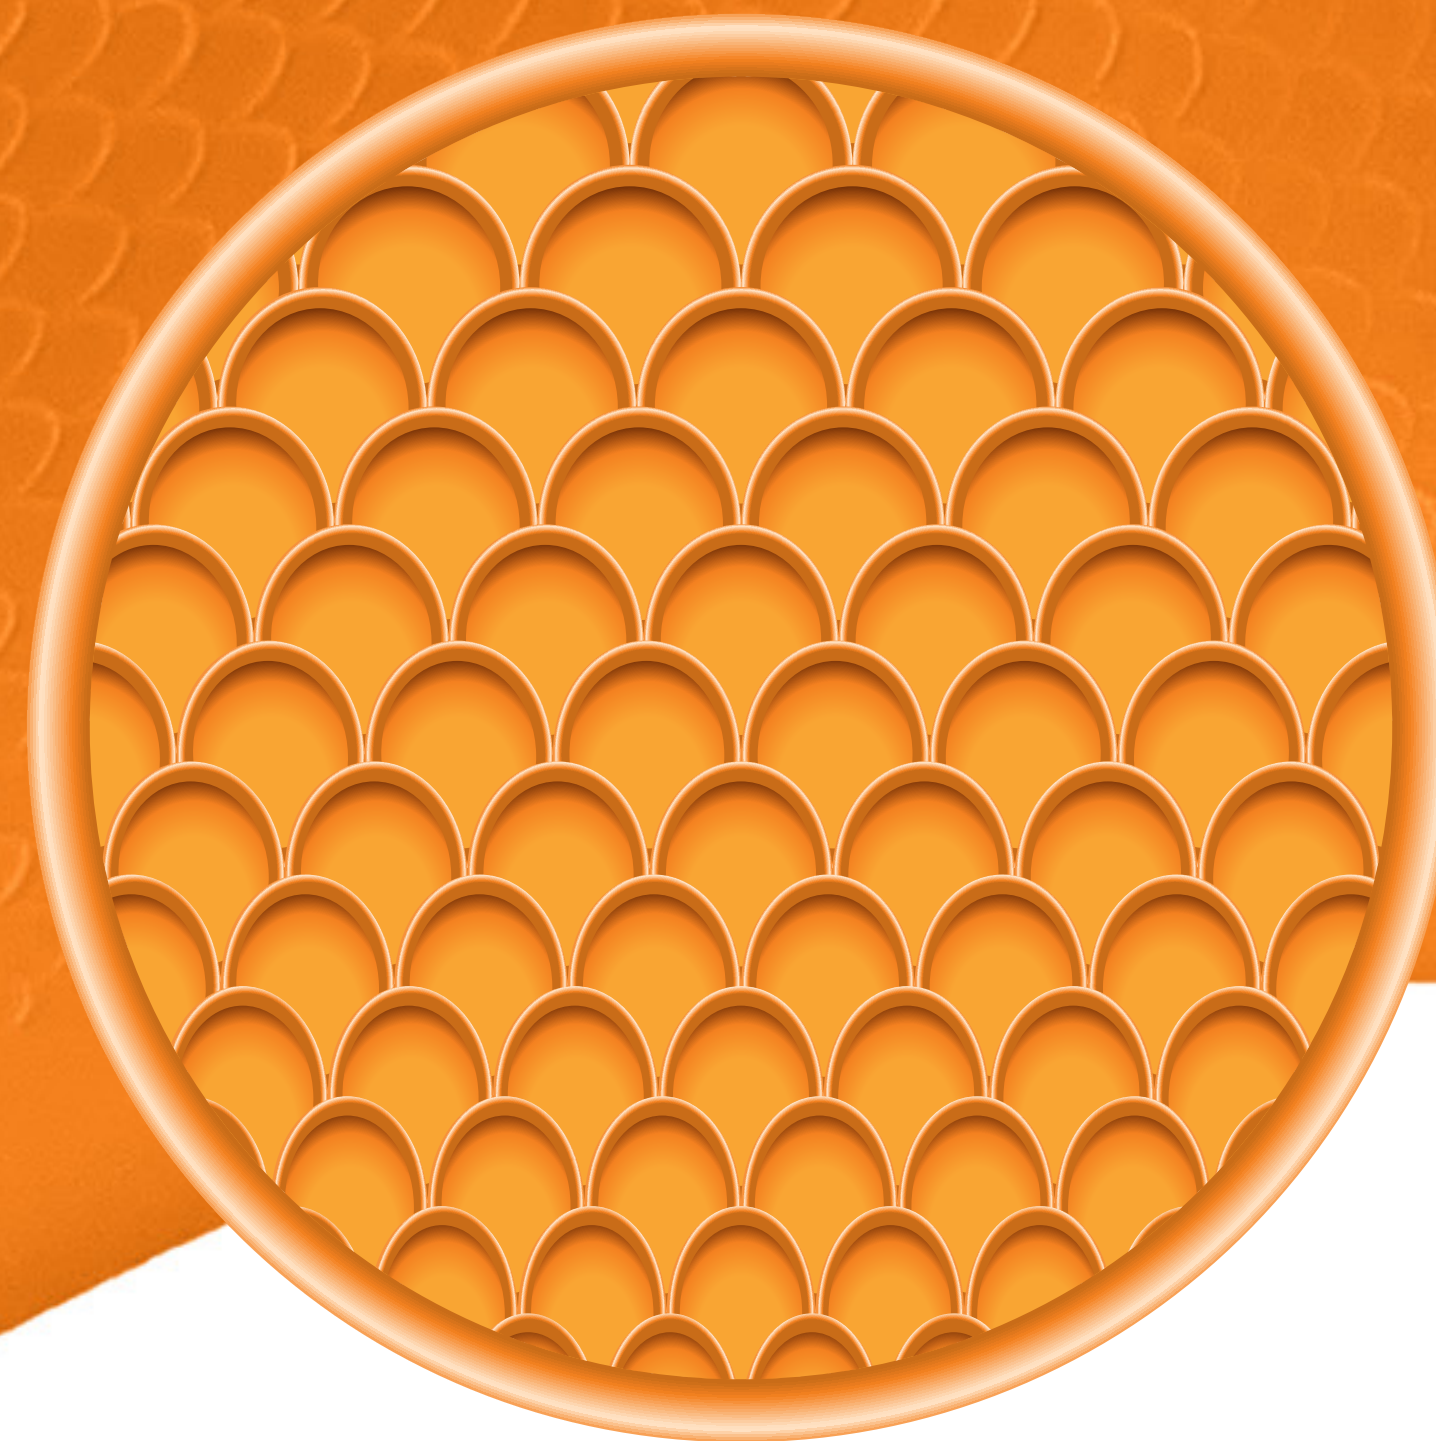

Internal Grip

Our embossed internal grip gives extra traction to stop the gloves slipping against the skin. It also helps to reduce perspiration.

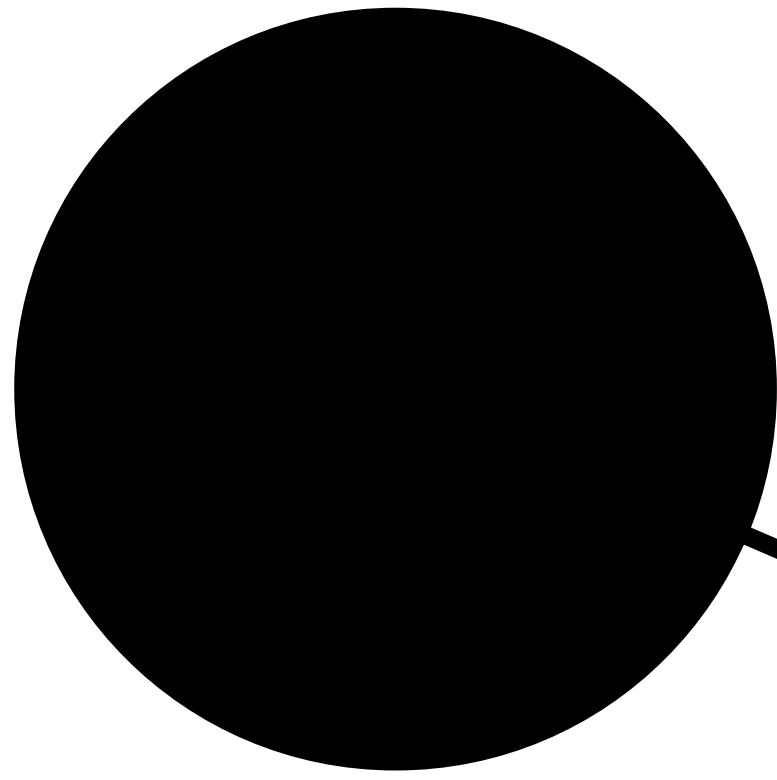

Tensile Strength

The lattice effect of our grip, massively adds to the tensile strength (+50%). We can use less curing in making the gloves which increases stretch and comfort and increases durability.

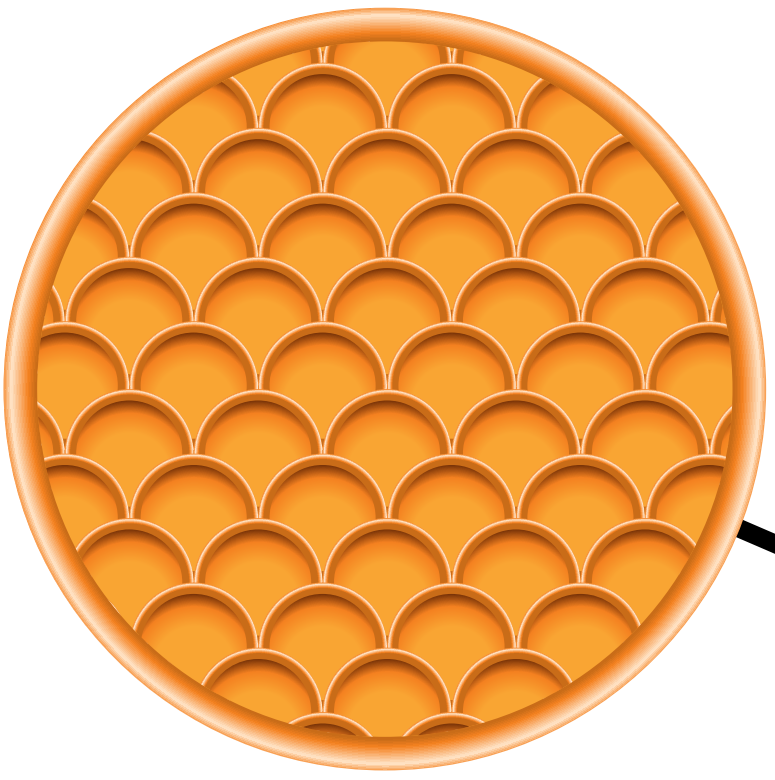

+50% More
Tensile Strength

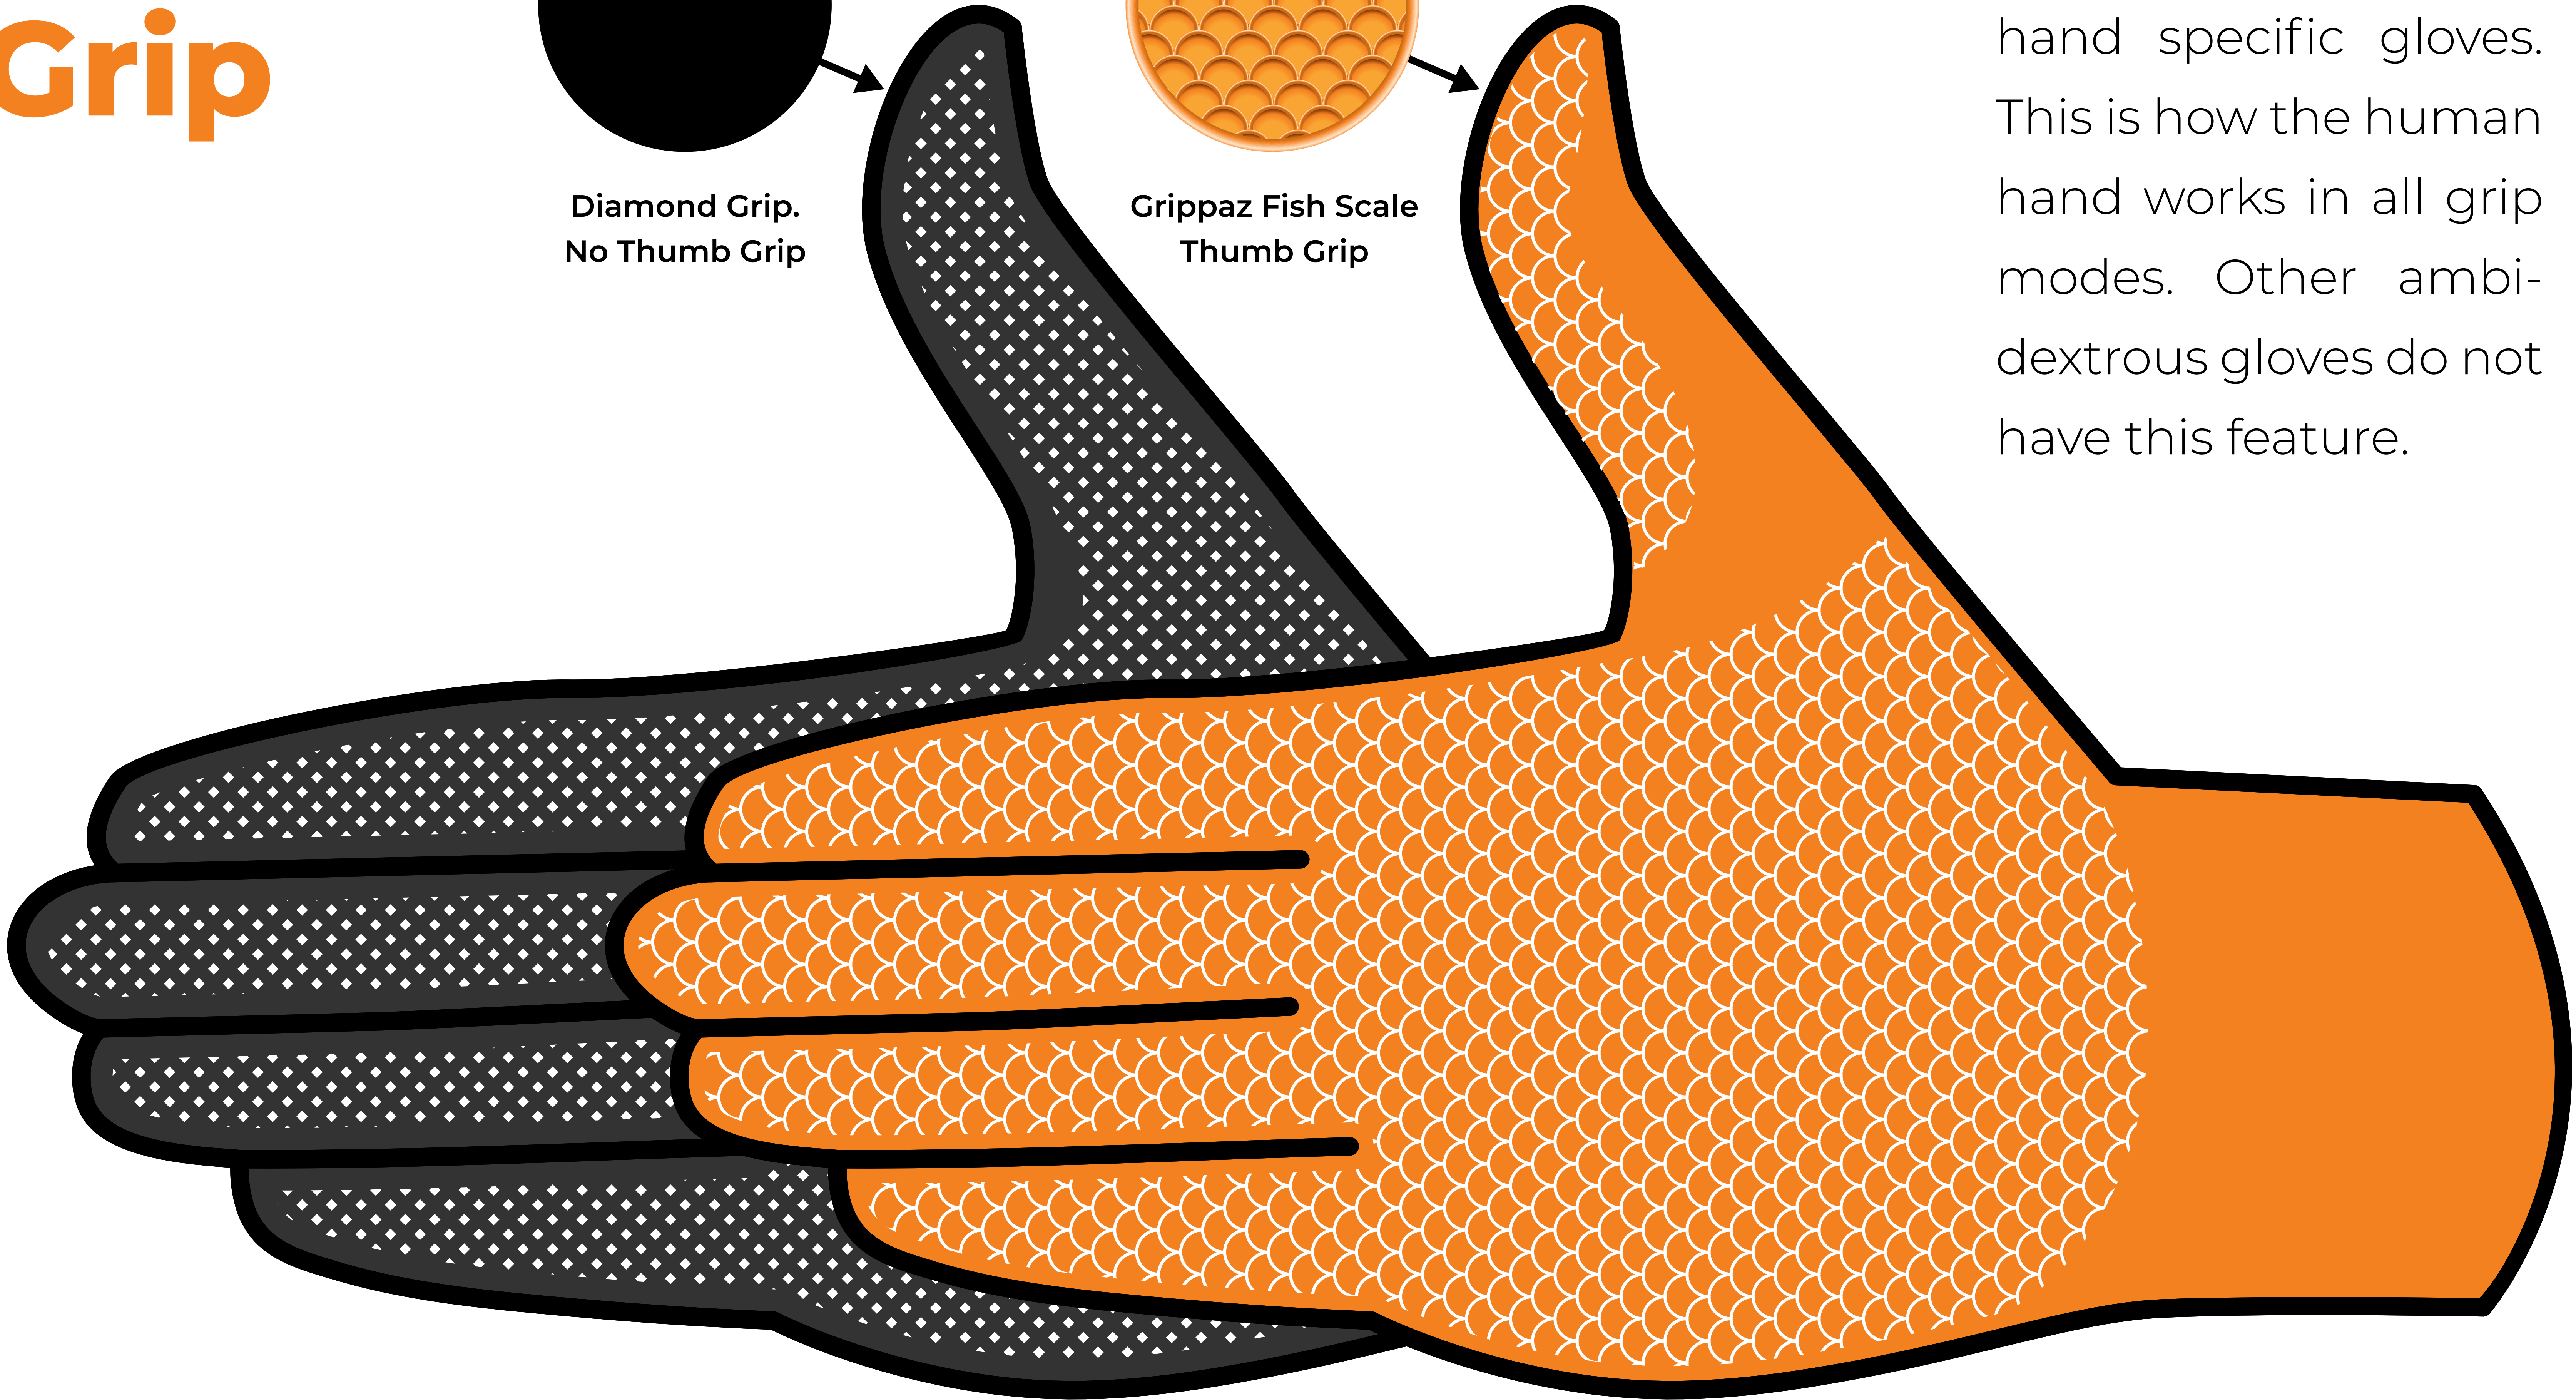

Thumb Grip

Diamond Grip.
No Thumb Grip

Grippaz Fish Scale
Thumb Grip

Grippaz use the same rotated thumb grip as hand specific gloves. This is how the human hand works in all grip modes. Other ambidextrous gloves do not have this feature.

Patented Worldwide

Grippaz holds patents in 47 countries worldwide including a **European Patent # EP3079513** (Granted 27/09/2019).
